

# **VALLEYSTREAM PICKLEBALL CLUB (VPC) SAFETY PLAN**

**VPC will provide guidance to our members to help keep them safe. This will be done through regular emails, web-site postings and bulletins, displayed at our facility.**

**VPC will ensure that our guidelines are up to date by reviewing the Ministry of Health guidelines on a regular basis.**

**VPC will screen for COVID-19 by using the Cana Trace software application. No one will be allowed to enter our facility until they have completed the Cana Trace screening process.**

**VPC will control the risk of transmission of COVID-19 by:**

**Keeping our facility locked except when it is in use,**

**Only allowing entry to members with the access code,**

**Only allowing entry to members who have an authorize booking,**

**Limiting the number of members that can enter the facility at any one time to a maximum of five,**

**Only allowing singles play,**

**Prohibiting guests, spectators or drop-ins to attend,**

**Mandating that members stay 3 meters apart at all times,**

**Encouraging members to sanitize their hands at the two sanitization stations,**

**Encouraging members to wear masks at all times, except when playing,**

**Insisting that members use their own balls and paddles and do not share equipment.**

**In the event of a potential case or a suspected exposure to COVID-19 at our facility, it will be reported to Ottawa Public Health and tracing will be done through the use of Cana Trace and the Skedda booking system.**

**Valleystream has two web-cams in place and members are aware that their actions could be monitored at any time.**
